Casting Materials:

Taxidermists' Greatest Picks – Casting Resins

Polyurethane Casting Materials:

Smooth-Cast 300 (Taxidermy Grade)

Has the lowest viscosity of any casting resin available. Pouring literally like water, Smooth-Cast 300 yields *white*, bubble-free castings in *10 minutes*. This material has no odor and contains no solvents. *Very low shrinkage* makes this fast-cast resin ideal for *turkey heads, fish heads, duck heads and reptiles*.

2 lb kit \$30.00 1 gallon kit \$98.00

Smooth Cast 316 – UV

This casting resin is *UV protected* – it won't yellow over time. Slow set time. Very low shrinkage makes this slow set resin good for special casting projects, injection of waterfowl feet; Add color for injecting turkey legs. 180 min. pot life

2 lb kit \$30.00 1 gallon kit available

Smooth-Cast 320

This *beige colored* resin that can be vibrantly pigmented. SC 320 is an *ultra-low viscosity* that yields bubble-free castings in *under 10 minutes*. Its beige color provides a great base color for *antler reproductions*. Castings are tough, durable and can be easily sanded.

2 lb kit \$30.00 1 gallon kit \$98.00

Smooth-Cast 325 Colormatch

A fast-setting *clear amber* casting resin that is easily pigmentable. The low viscosity of this resin replicates even the finest detail. Great for *fish fins, mushrooms, or anything requiring TRUE COLOR*.

2 lb kit \$32.50 1 gallon kit \$98.00
