One Hour Tan

This will SAVE YOU TIME & MONEY

Here's how to Tan a raw prepared deerskin in one hour

- 1.) Remove all blood & meat from skin side, use 3% hydrogen peroxide for a maximum of 15 minutes.
For best results remove ALL red meat, turn lips, eyes and ears.
- 2.) Salt skin side of hide overnight, then rinse well.
- 3.) Wash hide in DawnDishwashing Liquid, rinse well in cold water.
- 4.) Soak in Authentic Bactericide for 10 minutes, then rinse well.
- 5.) Mix 3/4 lb tanning powder (9oz Dixie cup is perfect measure) in 2.5 gal. of warm water.
- 6.) Add 10 oz table salt and stir until dissolved
- 7.) Submerge skin completely into tanning solution (if necessary use 1 gal plastic jug filled with water to keep skin submerged in tanning solution) soak hide in tanning solution 1 hour.
- 8.) Rinse well in cold water
- 9.) Flesh - tumble - mount or freeze

NOTE: If any pink coloration is present on the skin after fleshing, soak hide in tanning solution for an additional 20 minutes (you may use the same solution)

One Hour Tan can be used to tan ALL fur-bearing skins without problems.
For larger game, enough tanning solution should be prepared to submerge the hide completely.
For each 2.5 gal of water used, use 3/4 lb One Hour tan product and 10 oz salt.
2.5 gallons of solution is enough to tan one 20" whitetail cape.

One Hour Tan has been on the market for over fifteen years ~
& has been used by taxidermists around the world with excellent results.

National, International and World Champion taxidermists are using One Hour Tan!
