Portable Flesher

Beginning taxidermists and veterans with more than 25 years experience have all said that this machine is the most smooth, quiet, and easy-to-use machine that they have ever seen or used.

It is PORTABLE:

The total weight of the machine is only 40 pounds, so it can be used on almost any worktable. The sturdy base and rubber feet mean that it does not need to be clamped to a bench before use.

No belts!! No Pulleys!! That's right, the Authentic Portable Fleshers have DIRECT DRIVE.

Our new state-of-the-art flesher has a precision-machined flywheel attached to the motor shaft of a 1/2 HP motor. The flywheel and fleshing blade are covered with a cast aluminum housing with two adjustable guards.

Price \$845.00 plus shipping * Comes with sharpening steels & instructional video
